EDUCATION

University of Toronto (St. George)

Toronto, ON

Honours BSc, Computer Science Specialist, Statistics Major, ASIP Co-op

Sep 2024- Jun 2028

- Recipient of the University of Toronto International Scholar Award
- Relevant Coursework: Software Design, Data Structure and Algorithms, Machine Learning, Computer Organization, Database Systems, Statistics and Probabilities, Multivariable Calculus, Linear Algebra

SKILLS

Programming Languages: Python, Java, C, SQL

Data & Analytics: Data Analysis, Data Cleaning, Data Visualization, Machine Learning, Feature Engineering

Tools & Platforms: Git, GitHub, Excel (VBA), Dash, Plotly, Matplotlib

Software Engineering: Object-Oriented Programming, Version Control, Debugging, API Integration

PROJECTS

Financial Impact Prediction Model — SDSS Datathon 2026

Feb 2026

Tools: Python, pandas, scikit-learn, XGBoost, Streamlit

- Built a multi-class XGBoost classifier to predict financial improvement, decline, or stability after economic shocks
- Engineered income, province, debt, deposits, homeownership, and TFSA features from survey data.
- Evaluated results with accuracy, macro F1-score, and confusion matrix; deployed predictions through Streamlit.

Currency Exchange Rate Tracker

Jul 2025

Tools: Python, WindPy API, Matplotlib, Plotly

- Built a Python analytics tool to visualize 20+ years of historical foreign exchange data across multiple currency pairs
- Integrated the WindPy API to retrieve and process real-time and historical FX market datasets
- Implemented interactive filtering and automated chart generation to support trend analysis

Global Ecological Footprint Dashboard

Tools: Python, Dash, Plotly, Custom Tree Data Structure

Apr 2025

- Developed an interactive dashboard to visualize ecological footprint and biocapacity trends across 150+ countries
- Designed a custom tree-based data structure to support hierarchical filtering and aggregation
- Built interactive Dash and Plotly visualizations for geographic and temporal sustainability analysis

EXPERIENCE

Nomura

Shanghai, China

Asset Management Data & Operation Intern

May 2025 – Aug 2025

- Analyzed large-scale fixed-income trading and settlement datasets to support operational reporting and reconciliation
- Performed data validation, anomaly detection, and risk checks to improve data accuracy and operational reliability
- Automated reporting and analytics workflows using Python and Excel VBA, improving efficiency and reducing manual processing time
